

Year 7 – Smoking and Vaping

Information Brochure – Smoking and Vaping @ School

Activity Overview

- Students will create an information brochure aimed at providing valuable insights and guidance to the incoming Year 7 students.
- The content should focus on staying safe in high school, particularly in relation to alcohol and other drugs.
- The task allows flexibility by either restricting students to an A4 paper format or encouraging a more open approach, such as producing a website or an interactive information packet.
- The brochure should encompass essential support systems, resources, and practical advice for the well-being of incoming students.
- The activity promotes creativity, critical thinking, and effective communication skills.

Learning Intentions

- Understand the importance of support systems in maintaining a safe high school environment.
- Develop communication and information-sharing skills.
- Demonstrate awareness of potential challenges and solutions related to student well-being.

Success Criteria

- Creation of an informative brochure addressing key aspects of staying safe in high school.
- Inclusion of relevant support systems and resources.
- Clarity in communication and presentation style.
- Application of critical thinking to anticipate and address potential challenges.
