

Think Twice

Assessment Task

Learning Intention:

- Today we are: learning about how alcohol affects the body.
- So we can: make informed choices to keep our bodies safe.
- I will know I have been successful: when I can describe how alcohol affects parts of the body.

Some people may choose to drink alcohol when legally able to do so. It is important for young people to know how alcohol can affect and potentially even harm parts of your body. 	Assessment Task: Describe how alcohol affects parts of the body, including when it is circulating in the blood and the body parts that process and remove alcohol. You can also access online information to help with this task. Summarise information in your own words.
